 breeding barriers 44  
 – systems 127–135  
 bubble tube 178–181  
 bud pollination 38, 43  
 burst pollen grains 181

$^{45}\text{Ca}^{2+}$  uptake 53  
 calcium channel blockers 53  
 – channels 57  
 – concentration, pollen germination 277–280  
 – gradient 53

callase 7  
 callose accumulation 109  
 – deposition 35  
 – fluorescence 18  
 – formation 190  
 – plug deposition 85  
 – reaction 229  
 – stage 236  
 carbon dioxide effect on protein synthesis 103, 106  
 – – treatment 109  
 cell adhesion 213–217  
 – wall formation 85  
 cell-cell recognition 213–217  
 central callose 234  
 chemical hybridizing agent 231–252  
 chiasma formation failures 50  
*Chlamydomonas* 213  
*Clivia* 27  
 coefficient of crossability 118  
 cross eluates, stigma 279  
 cross-incompatibility 43  
 cross-pollen performance 228  
 cross-pollinations 109  
 crossability relationships 95  
 – interspecific 184  
 cutinase 222  
 cyclotic flux 27  
 cytotubules 62  
 cytochalasin 27  
 cytoplasmic inheritance 75  
 – male sterility 167–171  
 – streaming 27  
 – – in pollen tube 199, 200  
 cytoskeleton 258  
 – pollen tubes 200–203

*Datura* 5  
 deleterious recessive genes 134  
 desiccation pollen 139, 140  
 destructive effect of  $\text{La}^{3+}$  57  
 determination of paternity 92  
 developmental stages, embryo sac 221  
 – stress 167

dictyosome vesicles 85  
*Dictyostelium discoideum* 8  
 dimorphic pollen 193–198  
 dimorphism, sperm cells 75, 262, 263  
 dioecy 142–148  
 diploid androgenesis 15  
*Diplotaxis* 109  
 discrimination self/cross 280  
 DNA synthesis in anther 169  
 dot-blot analysis agglutinins 214, 216

ear age 266  
 ejected tube contents 88  
 ektexine 77  
 embryo sac development, stages 222  
 – – isolation 219–223  
 endexine 77  
 enforced inbreeding 39  
 enhancer effect 211  
 enzymatic isolation embryo sacs 213–219, 222, 223  
 erucic acid content 15  
 evolution self-incompatibility 130–132  
 excised anthers 1  
 exine 77  
 – coating 197  
 – stretching 251  
 – wall deposition 241, 244  
 – – – pattern 238, 250  
 exocytosis 85  
 expression of self-incompatibility 109  
 extraction agglutinins 214

F-actin, pollen tubes 200  
 FDA staining of sperm cells 100  
 fertilization, timing 265–269  
 fitness heterozygotes 129  
 flagellar surface 213  
 floral polymorphism 127, 129  
 flower colour 15  
 – types 143, 144  
 fluorescence emitted from callose 18  
 fluorochromatic reaction 137–141, 219  
 freeze fracture, pollen 270–280
